

HASSAN SROUR

Software Engineer

Beirut, Lebanon | +961 71 157 220 | hassansrou099@gmail.com | linkedin.com/in/hassansrou1 | github.com/hassansrou099-cell

PROFESSIONAL SUMMARY

Full-stack software developer and final-year Software Engineering student with hands-on experience building and deploying production web applications for real users across multiple industries. Proficient in JavaScript, React, Next.js, PHP, Python, and SQL. Demonstrated ability to design and maintain REST APIs, improve system performance, and deliver reliable backend and frontend solutions, from containerized deployment to system architecture and database design.

SKILLS

Programming Languages: JavaScript, PHP, Python

Frontend: React, Vue, Next.js, Responsive Web Design

Backend: Laravel, Flask, WordPress, Directus, ERPNext

Databases: MySQL, Firebase

DevOps: GitHub Actions, Git, CI/CD Pipelines, Vercel, Docker

WORK EXPERIENCE

Software Engineer | Harmonically Labs, Bucharest, Romania

04/2024 – Present

- Built and maintained web platforms for NGO clients across Lebanon and the Gulf region using Next.js for the frontend and Directus as a headless CMS/backend, containerized with Docker for consistent local and production environments
- Configured and customized ERPNext deployments to support NGO operational workflows, including inventory and records management
- Deployed and managed production applications across VPS (Ubuntu) and Vercel, handling environment configuration, containerized services, and release workflows
- Collaborated directly with NGO stakeholders to translate operational requirements into functioning, deployed systems

Full-Stack Developer | Brain Solutions, Beirut, Lebanon

11/2023 – 04/2024

- Developed a white-label e-commerce platform template deployed for Dar Al-Rafidain (daralrafidain.com), a live Arabic-language publishing and bookstore, as one of two developers — building the admin dashboard template system for dynamic storefront layout control, plus book listing, author/category views, and responsive UI components across the full stack
- Integrated third-party search APIs for book and author discovery, optimizing request routing and data processing across frontend and backend to achieve a 10% improvement in data processing speed and reduced backend latency, validating all integrations via Postman throughout development

EDUCATION

Bachelor of Science in Software Engineering | Antonine University, Baabda, Lebanon 2026

- Relevant coursework: Data Structures, Algorithms, Object-Oriented Programming (C++, Java), Mobile Development, Artificial Intelligence (Python), Database Systems (PHP), Web Development, Computer Networks

PERSONAL PROJECTS

Urban Compact & Performance Street — Two Medusa v2 / Next.js e-commerce storefronts, self-deployed on a Dockerized VPS with Nginx and SSL. github.com/hassansrou099-cell

LANGUAGES

Fluent in Arabic, English, and French
